CT CONSULTANTS' STAFF PARTICIPATES IN HIGH SCHOOL MENTORING PROGRAM

Cleveland, Ohio - Twenty students of James Rhodes High School of the Cleveland Public School District learned first hand from staff members of CT Consultants about technological advances in Land Surveying practices. The ACE Mentor program is a voluntary student program aimed at educating students about careers in architecture, construction and engineering.

Staff Members including Richard J. Iafelice, P.E., P.S., Vice President, and David Donley, Sean Snezik and Matt Miley of the firm's Survey Department provided a hands on lesson on the importance of surveying prior to starting the design of a project. Following a brief introduction, students worked first hand with state of the art technology to collect field data from the school's parking lot then download the data to computers, and developed a map of the collected information.

CT Consultants is a company that supports the communities with which we work and are proud to to have been involved in the ACE Mentor program.

About CT Consultants

CT Consultants is an Ohio based engineering, architecture, land surveying and construction services firm which has been providing municipal engineering services for over 85 years.
